Engineer: *Hoyle, Tanner & Associates ?*

Description of Work:

WPC provided all labor, equipment and materials to expand the existing water treatment plant and construct a membrane Nano-filtration building with new treatment equipment and chemical feed systems. WPC also performed all installations of piping and pumping equipment, electrical and instrumentation. All associated site work including yard piping, site grading, landscaping and paving and concrete water storage tank demolition were also WPC's prevue. The completed facility provides a water treatment capacity of 6MGD.

Explanation of any time extensions and/or changes in contract amount:

Additional time extensions were given to construct owner requested changes. The contract amount was lowered to allow for owner direct purchases. The owner avoided sales tax with direct purchases.
